About Kickbox

Our Story

Kickbox is a white hat service provider, whose team has been building email technology for more than a decade -- from anti-spam to email encryption. This knowledge and experience comprises the foundation on which Kickbox is built and has helped us become the leader in the email verification industry.

Kickbox provides technology that promotes email best practices and improves deliverability. Our mission: ensure customers with opt-in contacts get their message to the inbox and to prevent all the rest from hitting Send.

The Team

Kickbox's team includes folks from all walks of life who believe in the core mission: Move Email Forward. And also the other core mission: keep the snack bunker stocked. An assorted group of coders, artists, gamers, and self-proclaimed comics (they're really pretty terrible), we maintain a relaxed, productive culture.

Dan Stevens CEO

Jack Wrigley VP of Business Development

Dennis Dayman DPO

Matt Gonzales VP of Product & Compliance

Jessica Martinez Marketing Director

Brian Dayman Enterprise & Partner Marketing

Iain Anton Sales Director, EMEA

Brenna O'Neill Account Manager

Tymothy Clark Office Manager

Gregory Garden UI/UX

Careers

Kickbox is always on the lookout for incredibly talented, collaborative, and entrepreneurial people. We also love people who are obnoxiously dextrous, reasonably hungry, and have a sloth-like wit. Think you're the right fit? Has this page read like an unexpected love letter from someone
